

# Team Teaching for Learning Support

**CBS Thurles**

## In our school

Team teaching is primarily used to provide effective learning support within our school.

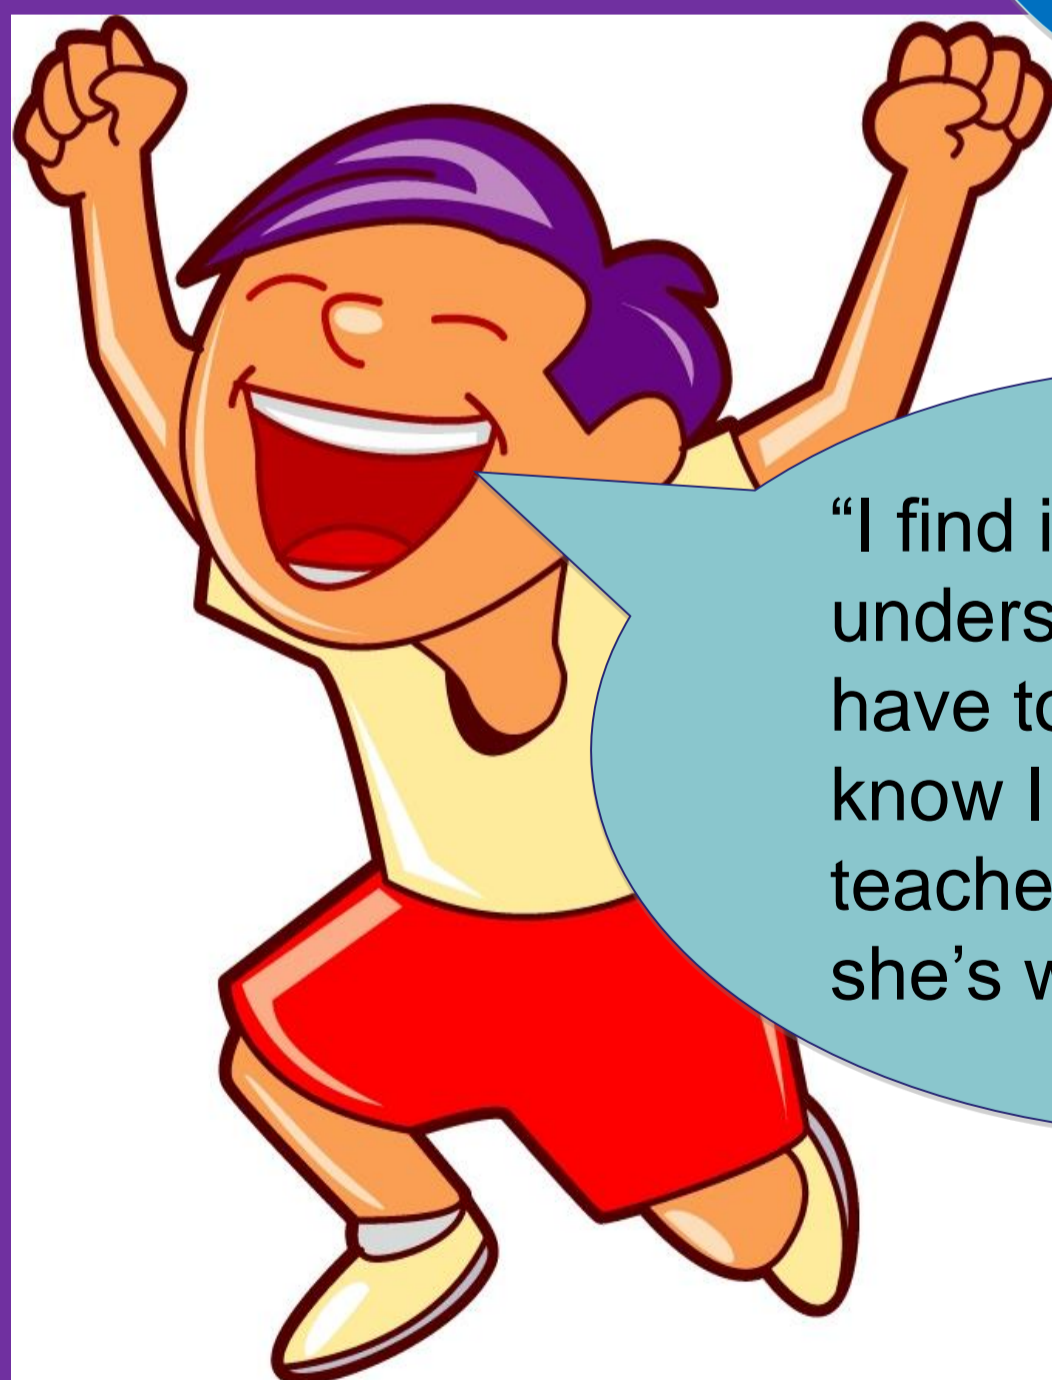

Students requiring additional support are assisted within that subject class time – students have a greater understanding & take part more confidently in the planned activities at the time they are happening. This allows those students to be more engaged during the process of the activity, thereby also increasing their motivation.

Stronger  
Relationships

Professional  
Collaboration

Shared  
Workload

“I find it much easier to understand what we have to do because I know I can ask the teacher for help while she’s walking around.”

“Many hands  
make light  
work”
