

DEATH BY POWER POINT

Background

- to improve my own skills in the use of PowerPoint
- introduce variety to my teaching methodologies
- move away from "talk 'n chalk"

Conclusions

- Power point on its own did not work well
- "Talk 'n chalk" is not dead

Method Used:

Power point only
(included pictures and writing)

Ms, I do not like power point. Would you please go back to your normal way of teaching
(5th year Honours Biology student)

Where to go from here?

I hope to introduce power point again, but this time I will give the students a copy of my Presentation.
