

TEAM TEACHING

Teaching 5th Year Higher Level Maths

Amanda Leahy & Karen Sewell
St Paul's Secondary School, Greenhills.

What went well:

- Students engaged well with the both of us and were very welcoming to a new teacher in the class.
- We worked really well as a team.
- We were able to give students more time individually which was very beneficial for students, especially those who were struggling.
- It was a great learning experience, we were able to learn from one another and develop skills in team work and the math itself.
- We both got to try new things from working with a new class to having an opportunity to see another teacher teaching and being able to have a discussion after every single class we taught about what went well and not so well, allowing us both to improve for the next day.

What we'd improve on:

- Some aspects of the experience were difficult for example, finding time to plan. We were teaching a double higher level 5th year class, so there was a lot of planning needed.
- We were a little off with some of the planning in terms of how long it would take to complete topics and activities (We were able to correct this for the next class and wasn't a problem again afterward).

"We did a lot of new activities. It was fun and made it easier to learn."

"It was great to have two teachers in the room. Any confusion was cleared up."

"It wasn't what I expected. It was actually really fun"

"We never did something like this before, it worked really well."

"Both teachers worked well together and the class was easy to follow."
