

# Team Teaching: Collaborative Learning

*Niamh Maguire. St.Peter's College Dunboyne, Co. Meath*

## Positives

- Teachers get an opportunity to collaborate with each other.
- Students have a greater opportunity to receive help when there are two teachers in the classroom.
- An effective technique for classroom management.

## Areas to work on

- Planning is key however timetable restrictions can make it hard for teachers to find time to plan.
- Similar teaching styles are important in order to create an effective and successful team teaching experience however, this may not always be possible to achieve.

Students feel they can ask more questions, have their work checked more regularly

Teacher collaboration is becoming more important

Progressive education

# Team Teaching:

Important for schools to value

Very effective for ordinary or mixed ability classes
