

## Tips for the Audio Visual Case

### *Section A:*

The Audio Visual Case usually profiles a business, an area or community enterprise or organisation. The six minute Case on DVD is shown at the beginning of the examination. Students answer eight questions. Remember you are assessed on:

- What you see
- What you hear
- Applying your LCVP Knowledge, learning and skills

Read the **eight** questions carefully before the DVD commences and underline the **main parts**. Ensure to take notes on the rough work sheet on the inside cover of the answer booklet.

**Remember the last few questions carry a substantial amount of the marks.** In fact Question 7 and Question 8 are worth 12 marks. Therefore they require detail, ensure to elaborate and always give examples if appropriate.
